WHAT IS DOCKER

- Takes the cake and copies it. When you run, it **doesn't require any setup or installation**
- Requires **Docker Engine**, which can sit on a very bare bone server

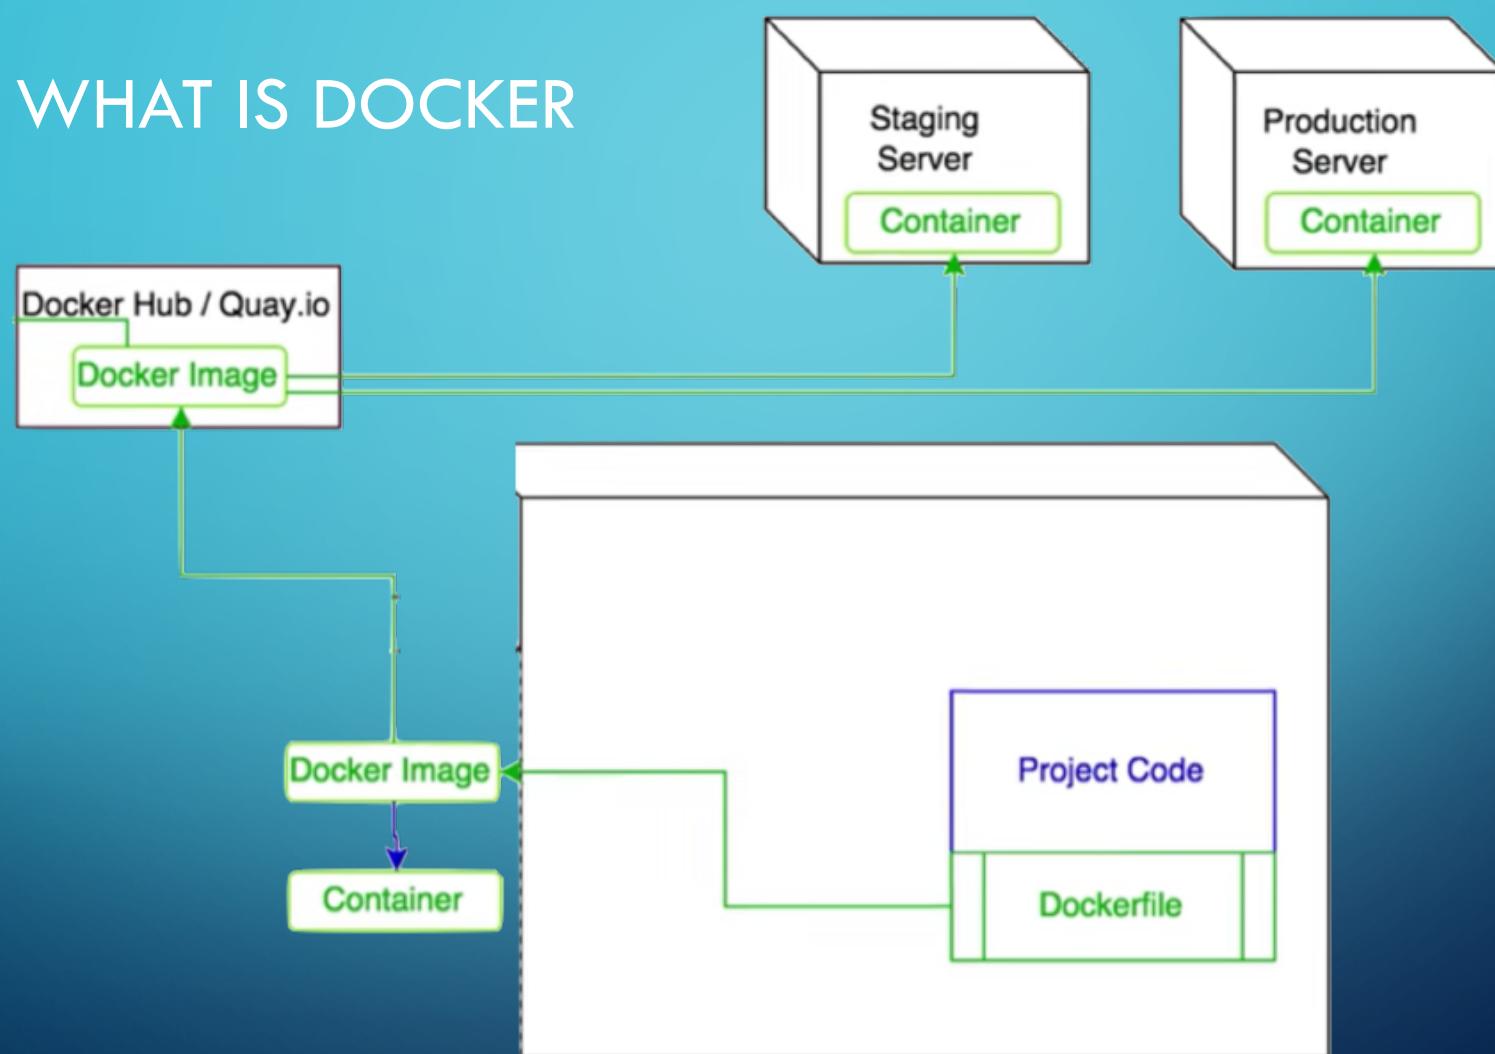

VIRTUAL MACHINES VS DOCKER

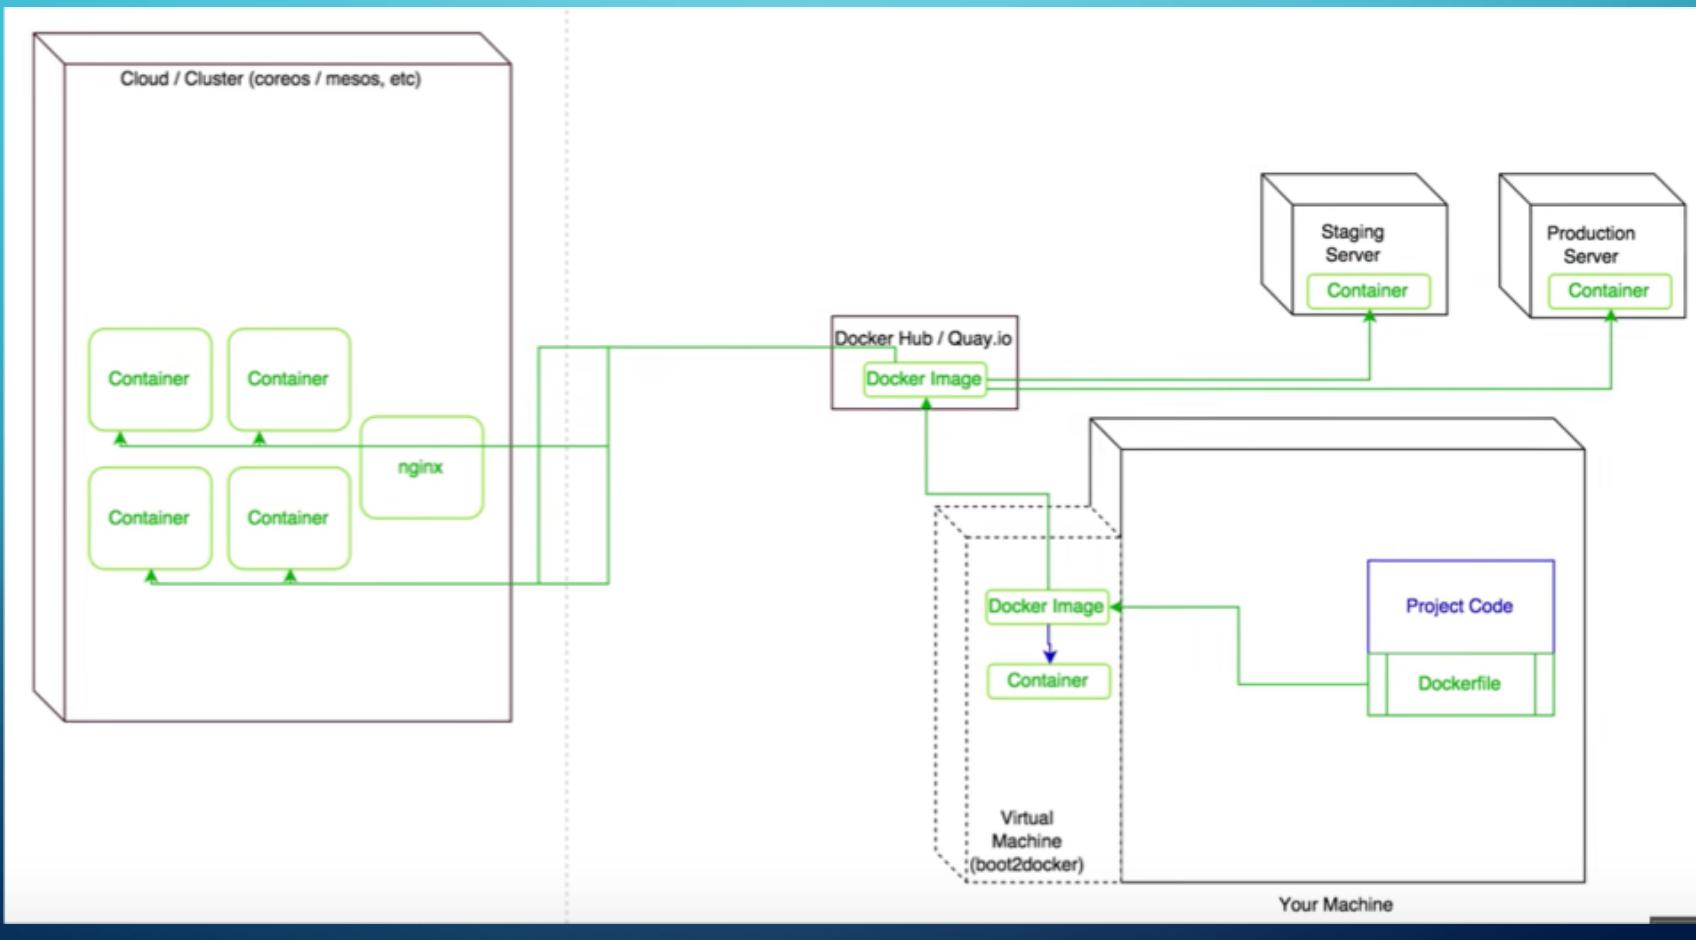

WHAT IS DOCKER

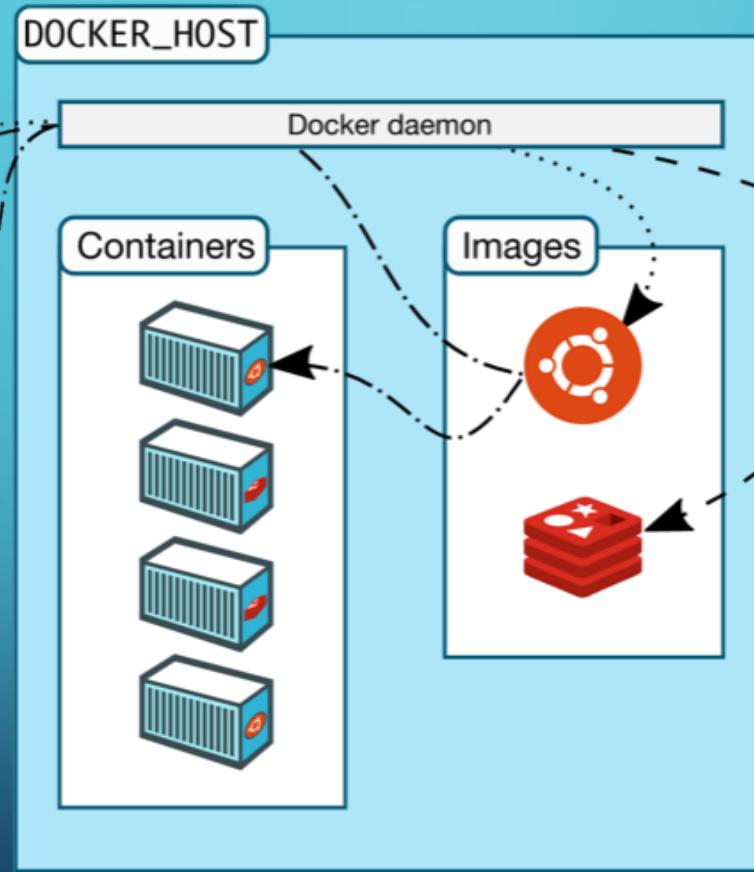

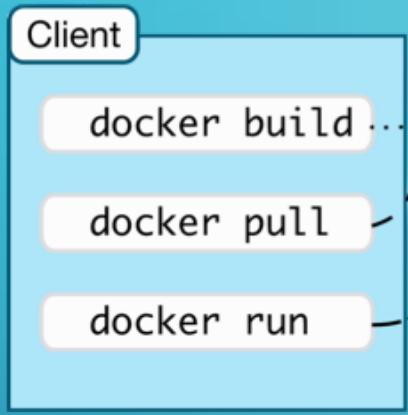

- Copies the cake **without setup or installation**
- Requires only **Docker Engine**,
 - Can sit on a very bare bone server
- Self contained
- Images can be uploaded and cloned to replicate the exact same app.
